

Preparing for the FDC3 developer's
beginner training session

Yordan Yordanov, Senior Product Manager

interop.io

Step-by-step guide

1. Read the [documentation](#) page on how to add the io.Connect FDC3 library to your app.
2. Install the `@interopio/fdc3` library in your app.
3. (optional) Add our [widget](#) to your app to get a color channel selector.
4. Load the Sandbox URL located at <https://sandbox.cloud.interop.io> in any modern web browser. Use a Chromium-based one for a full set of features.
5. Enable/allow all permissions for a full set of features.
6. Click the button to open the 'Create an FDC3 app' workspace in a new tab.
7. Paste the URL of your app and type in its name in the 'App loader'.
8. Your app should now be added to the list of predefined demo apps in the workspace.

n.b. The Sandbox environment is non-persistent.

Fallback option using io.Connect Desktop

1. Read the [documentation](#) page on how to add the io.Connect FDC3 library to your app.
2. Install the @interopio/fdc3 library in your app.
3. Go to <https://interop.io/free-trial/> and register for a free 30-day trial.
4. Open the email you received and click on the link to accept the invitation. Check your spam folder if you don't get the email.
5. Create a password for your account.
6. Enable/allow all permissions for a full set of features.
7. Click on the button to download io.Connect Desktop.
8. Initiate the installation and select 'Install trial version'.
9. Enter your email address and the password you created at step 5.
10. After the installation is complete, add the following list of apps following the [documentation](#):
 - a) Your app
 - b) FDC3 Sandbox –
 - c) Client list –
 - d) Client portfolio –
 - e) Chart –
11. Start io.Connect Desktop
